BLUE MAXIBOND SOLUTION INSTRUCTIONS FOR USE

DESCRIPTION

Blue Maxibond Solution is a blue colored vulcanizing fluid, extra tacky and can be applied in one thin, even coating with an 8 to 10 minute dry time. One coat is sufficient in hot and cold applications. It is packaged in ready-to-use containers with brush/lid applicators.

RECOMMENDED USE

Blue Maxibond Solution is an excellent product for bonding repair patches to belting when time is critical.
